Lab Policy & Outline - CSE251 Fall 2026

Marks Distribution

Lab Attendance	Lab Performance	Lab Report	Lab Test 1	Lab Test 2	Total
2	4	5	8% will be from the better one and 6% from the other, for a total of 14.		25

Attendance Policy

- Attendance in at least 4 out of 5 labs is mandatory in order to attend lab tests.
    - Medical documents must back excused absences.

- Lab performance marks will be awarded based on the performance of the group.
    - In case of absence, lab performance marks will be zero (0) for a particular student in that experiment.
    - In case of a late, half attendance will be considered, and for 2 lates, 1 absence will be counted.
    - Lab performance marks will also be halved if a student gets late attendance.
    - If a student remains absent in a lab, he/she can do the **makeup lab** with another section.
      To do so, he/she has to email and get permission from the faculty members of his or her section (keeping them in the cc) and the section he or she intends to do a makeup lab with.

    - If there is no section available to do the makeup lab, the student won't get any mark in lab performance even if he/she provides medical documents.

Lab Group

As a general rule, there will be **3/4 students per group**.

Lab Test

A hardware lab test-1 will be held based on Exp-01 and Exp-02, and another hardware lab test-2 will be held based on Exp-03 to Exp-05. Attending the lab tests is mandatory to get a passing grade in the lab. During the test, a student will be given one experiment randomly.

The students need to:
(1) **Draw** the circuit of the experiment
(2) **Construct** the circuit on the breadboard
(3) Take **measurements**, do some calculations, and/or show the output

(4) Answer some simple **viva** questions based on the things taught in class

Lab Report

- **At least one student from each group** should submit the lab report for each experiment.
- Each student may submit a **maximum of 3 reports**, of which the **best 2** will be counted. Every student must submit **1 report before the midterm and** one or two reports after the midterm.
- At the end of the semester, each student must submit a total of **2 reports**, **one before Lab Test 1** and **another before Lab Test 2**.
- Not more than 3 reports can be submitted by a student.

Plagiarism Policy for Lab Reports

Plagiarism is strictly prohibited and will result in severe penalties.

What is Considered Plagiarism?

Plagiarism includes, but is not limited to:

- Copying from another student's report.
- Using AI tools (e.g., ChatGPT or similar tools) to generate the report.
- Copying content from search engines (e.g., Google) or any online/offline sources without proper authorization.

Penalty for Plagiarism

- If a report contains any form of plagiarism, the student will receive **0** for that report.

  Example: If a report is graded out of 10 marks and plagiarism is detected, the student will receive **0 out of 10**.

- The plagiarized report:
  - **Will still be counted** among the student's best two submissions.
  - **Cannot be replaced or resubmitted** under any circumstances.

Repeated Offense

- If a student is found guilty of plagiarism in both counted lab reports, the student will receive **-5 out of 5 for the overall lab report grade.**

Tentative Lab Outline

Lab Activity	Lab Title
Exp-01	Study of Op-Amp: Comparator, Non-Inverting Amplifier, Inverting Amplifier, Inverting Summing Amplifier, and their VTCs
Exp-02	Study of I-V Characteristics of Diode and Equivalent CVD Model Verification
Exp-03	Study of Half-Wave and Full-Wave Rectifier
LAB TEST-1	**Syllabus: Exp-01, Exp-02 & Exp-03**
Exp-04	Study of I-V Characteristics of Transistors (BJT) and Implementation of Logic Functions
Exp-05	Study of I-V Characteristics of Transistors (MOSFET) and Implementation of Logic Functions
LAB TEST-2	**Syllabus: Exp-03, Exp-04 & Exp-05**

Tentative Lab Schedule
